

Social Drinkers

BY: DILLIAN HART, ETHAN
HUFF, NATE, MICHAEL,
AND ETHAN TATTON

Architecture and Tech Stack

Frontend

- ▶ Next.JS
- ▶ TypeScript
- ▶ TailwindCSS
- ▶ Axios

Backend

- ▶ Django
- ▶ Database : Custom
- ▶ Peer2Peer : Custom

Project Retrospective

Biggest Win

Built a custom peer to peer network which handles user data, database info, and authorization requests.

Biggest Fail

We chose Axios for easier API integration. During development there was a major Axios vulnerability that nearly caused all of our computers to be hacked.

Credits

Nate: Lead frontend dev; project architecture; auth system; API integration.

Dillan: Peer to peer network designer; docker architect; server onboarding.

Michael: Frontend; Logistics and Store manager dashboards.

Ethan H: Lead endpoint dev; RBAC security; backend integration tests; JWT.

Ethan T: Frontend; Testing; Home dashboard; Colors and Logo Design.
